## INTRODUCTION

MR ETIENNE CARUANA

*Census Officer*

The Census of Population and Housing is a detailed statistical exercise featuring Malta and its people by their demographic and social characteristics. It provides a portrait at a point in time, and for the 18th Census, this was 21 November 2021. The Census's legal basis is the national Census Act 1948 and the supranational EU Regulation No 763/2008.

Compilation work went into the early months of 2022 and the Preliminary Report was published in Summer 2022. Following this, the NSO is publishing the first in a series of thematic Census publications. It covers a range of social subjects such as population, migration, citizenship, racial origin, and religious affiliation. This introduction synthesises the main findings under these headings.

### Population

- Improved access to administrative registers, and enhanced methods in data collection, allowed the Census Office to arrive at the final population count in time to publish it in the Preliminary Report.
- The population headcount recorded the highest ever intercensal change, 25 per cent over the Census headcount recorded in 2011.
- The proportion of males was bigger than that of females for the first time ever - 52 per cent of the population.
- Population density, already the highest in the EU, continued to climb in line with the increase in population.
- The average age of Gozo residents was two years more than the Malta counterpart. As a demographic indicator, the average age in the Islands was impacted by the influx of foreigners, since foreign nationals generally tend to be younger than the Maltese.

### Immigration

- The number of foreign nationals increased fivefold compared to the last Census in 2011.
- 22.2 per cent of the population were foreign nationals, a steep rise from the 4.9 per cent share recorded in 2011.
- Male foreign nationals outnumbered their female counterparts by more than 20,000.
- Nearly 15,000 incoming migrants lived in another country one year before the Census. This number included an element of Maltese returning migrants.
- The foreign community was mostly concentrated in San Pawl il-Baħar, Tas-Sliema and Msida.

### Racial origin

Racial origin is a complex concept. People can have single or multiple racial origin. It should not be equated with citizenship, language, or religion. Moreover, many factors can influence respondents such as their own perceptions of where they came from, as well as their knowledge of their own families' histories. Among foreign nationals, the proportions were:

- 58.1 per cent Caucasian.
- 22.2 per cent Asian.
- 6.3 per cent African
- 6.0 per cent Arab.
- 4.5 per cent Hispanic or Latino.

### Religious affiliation

The question on religion/religious denomination was asked to respondents aged 15 and over. Roman Catholicism was predominant, with emerging shares of Islam and Orthodoxy:

- 82.6 per cent belonged to or identified themselves with Roman Catholicism.
- 3.9 per cent belonged to or identified themselves with Islam.
- 3.6 per cent belonged to or identified themselves with Orthodoxy.

## Acknowledgements

The above are only some excerpts from the rich and diverse fund of Census findings. I am sure that those users who choose to delve deep will find ample material to plan their own analysis and customise their own texts and tables. My thanks are due to the Census Office within the NSO which compiled the tables and undertook the analysis, led by Silvan Zammit and Matthew Zerafa, the two Deputy Census Officers. A special mention is due to the public entities, organisations and NGOs which made available their administrative registers, and which gave advice. The ultimate acknowledgement must be for the contribution of the resident population of Malta whose response formed the backbone of the Census results.

**POPULATION**

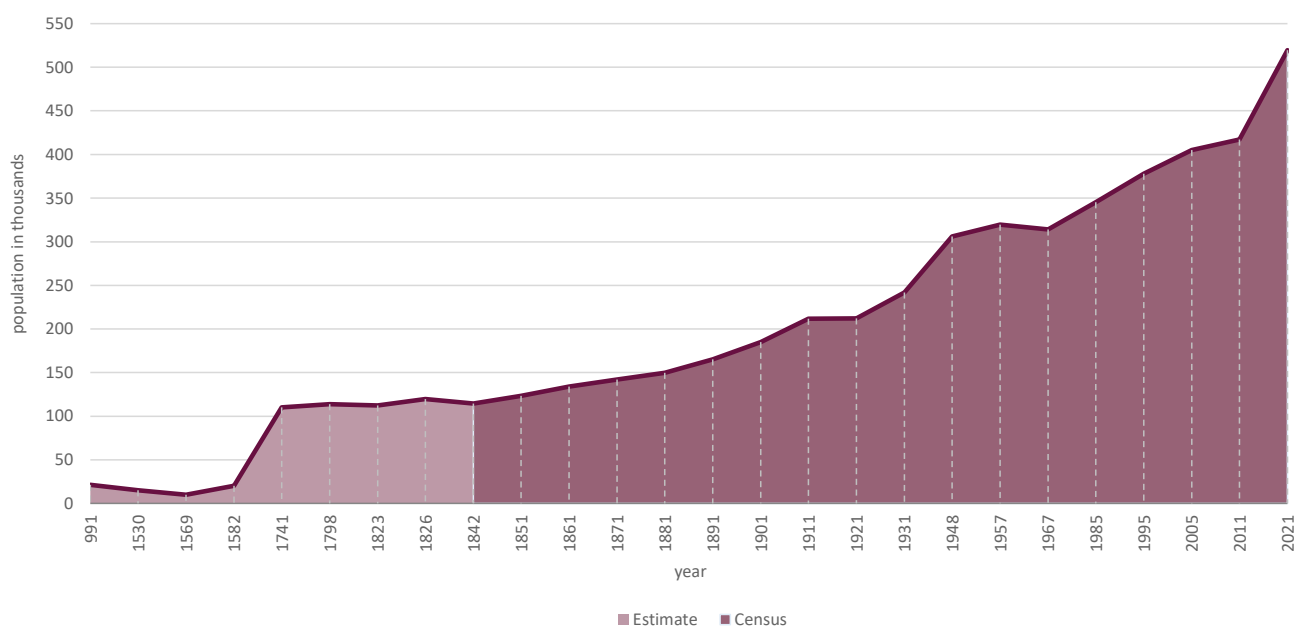

## POPULATION

### Population growth

On Census Day, 21 November 2021, the usual resident population in Malta stood at 519,562, more than doubling over a century. Since the last Census, the population grew by more than 100,000 from 417,432 residents in 2011 – this is equal to a 24.5 per cent increase over just 10 years. This is the largest intercensal growth ever recorded to date, resulting from a steady growth of approximately 10,000 residents per year over the last 10 years. Prior to the 2021 Census, the largest ever recorded average intercensal growth was between 1931 and 1948, where it stood at 3,786 persons per year.

**CHART 1.1. Population counts between the years 991 and 2021**

On Census Day, there were 480,275 persons residing in Malta and 39,287 residing in Gozo. Since the 2011 Census, both regions registered an increase of approximately 25 per cent. The population likewise grew in all the six geographical districts, though this growth was not equal.

The highest population growth was observed in the Northern district with an increase of 47 per cent compared to 2011 (a gain of approximately 30,000 residents). The second largest increase was noted in the Northern Harbour district (30.6 per cent). On the other hand, the district with the smallest growth was the Southern Harbour district, recording an increase of 8.3 per cent.

The three largest localities are San Pawl il-Baħar, Birkirkara and Il-Mosta – these three localities alone account for 15.7 per cent of the total population in 2021. The population in San Pawl il-Baħar has almost doubled since 2011, exceeding 32,000 inhabitants.

The localities registering the largest increases in population in 2021 were San Pawl il-Baħar (95.4 per cent), Iż-Żebbuġ, Għawdex (79.4 per cent) and L-Imsida (75.4 per cent). These are all localities which are predominantly characterised by a high share of foreign residents. Eight localities had a decrease in population since 2011, and six of these were localities within the Southern Harbour district.

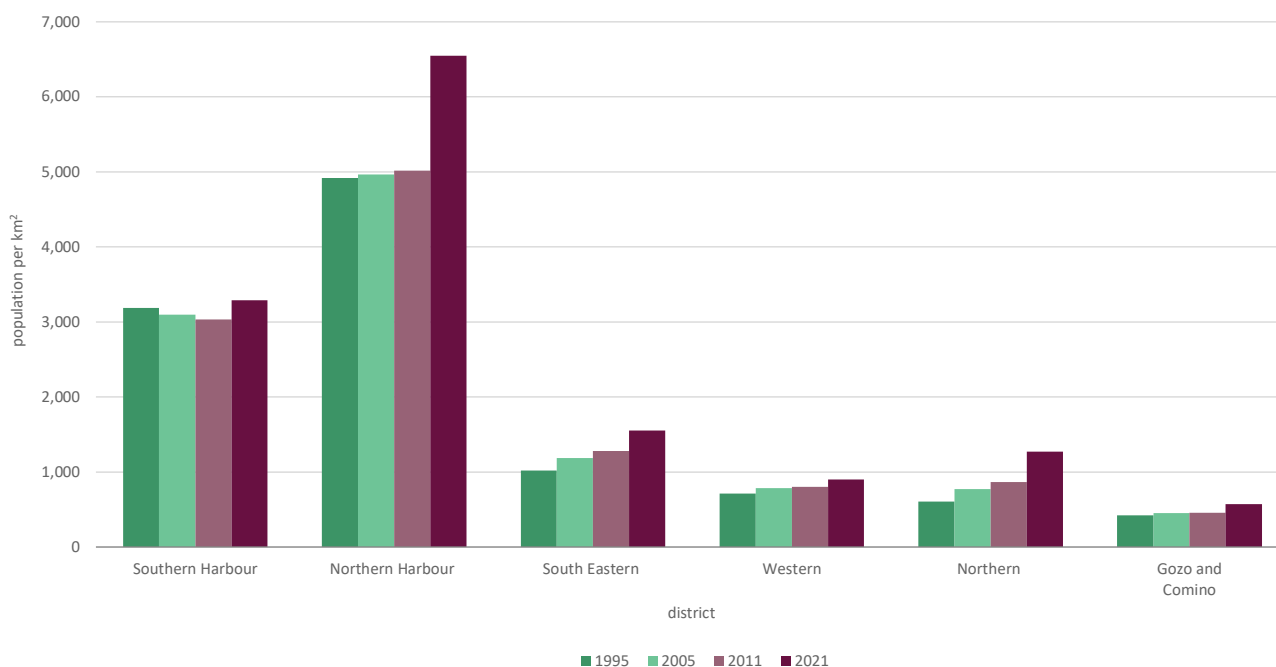

### Population density

Malta remains the most densely populated country in the EU with 1,649 residents per square kilometre. The average population density in the EU, in 2019, stood at 109 persons per square kilometre. While the Netherlands is the second most densely populated country, it is still three times less dense than Malta, with 507 persons per square kilometre.

Differences in population density within Malta exist when comparing across varying geographic levels. On a regional level, the population density in Malta stood at 1,948 persons per square kilometre, compared to 572 inhabitants per square kilometre in Gozo.

The Northern Harbour district is the densest district, with 6,547 residents per square kilometre. Localities within this district, like Tas-Sliema, Tal-Pieta' and Il-Gżira, have a population density of more than 10,000 persons per square kilometre. Similar thresholds were recorded among localities within the Southern Harbour district. Localities like Hal Tarxien, Il-Fgura and L-Isla, also recorded a population density of more than 10,000 persons per square kilometre.

**CHART 1.2. Population density by district**

Tas-Sliema is the most densely populated locality with 15,167 persons per square kilometre while L-Ghasri is the least with 104 persons per square kilometre - the latter being the only locality which is comparable to the EU average. Among Gozitan localities, Ir-Rabat, Għawdex and Il-Fontana had the largest population densities with more than 2,000 inhabitants per square kilometre in each locality.

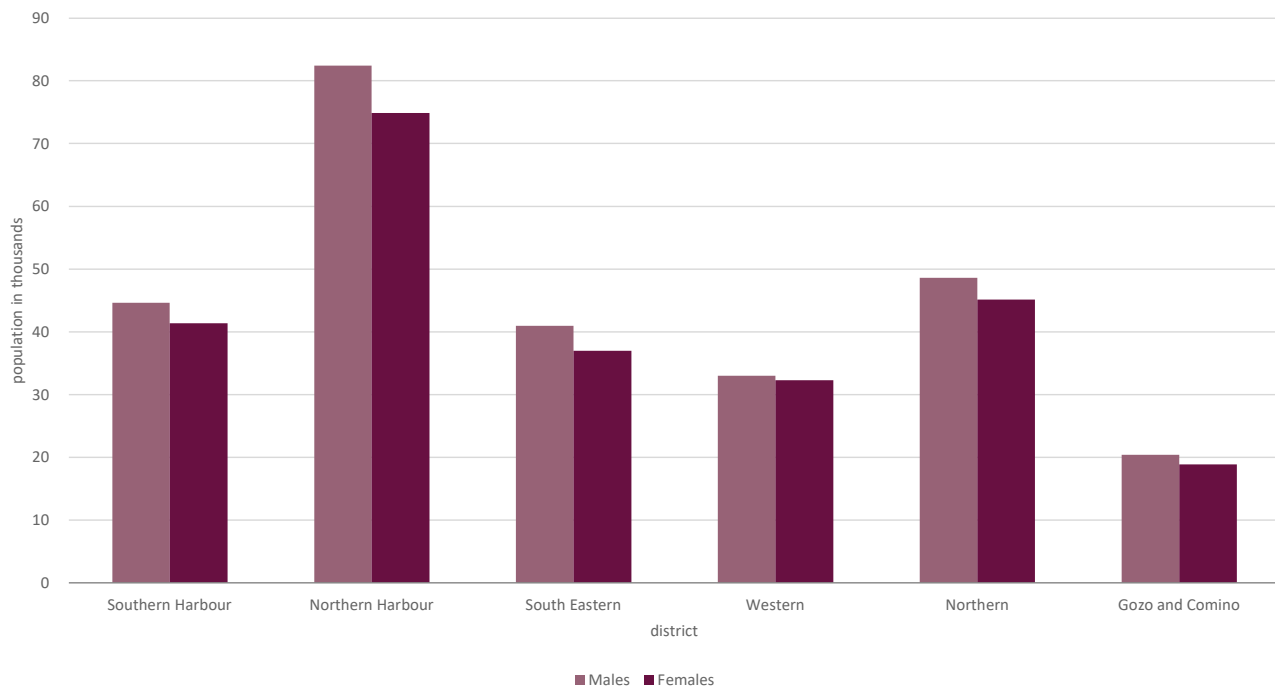

**Sex**

There were 270,021 men (52 per cent of the population) and 249,541 women in Malta, resulting in a sex ratio of 924 females per 1,000 males. For the first time ever, the 2021 Census recorded more males than females within the Maltese population. This resulted from a faster growth among the male population (+ 30.1 per cent) over the past 10 years when compared to the female counterparts (+18.9 per cent). This is different from the sex distribution in the EU (as at January 2021) where there are more females (51.1 per cent) than males. In percentage terms, among EU countries with a higher share of males, Malta had the largest percentage of male residents. This was followed by Luxembourg with 50.3 per cent of the population being males.

Similar sex distributions are observed in Malta and Gozo. At district level, the Western district had an almost even share of males (50.6 per cent) and females (49.4 per cent); and the South Eastern district recorded the widest gap between the sexes (52.5 per cent being males and 47.5 per cent being females).

**CHART 1.3. Population distribution by sex and district**

At a locality level, Birzebbuga had the largest share of males, with 57.8 per cent; followed by Il-Marsa (57.6 per cent) and L-Imsida (55.9 per cent). A few localities had slightly more females than males, however, the share of males and females was almost even.

### Age

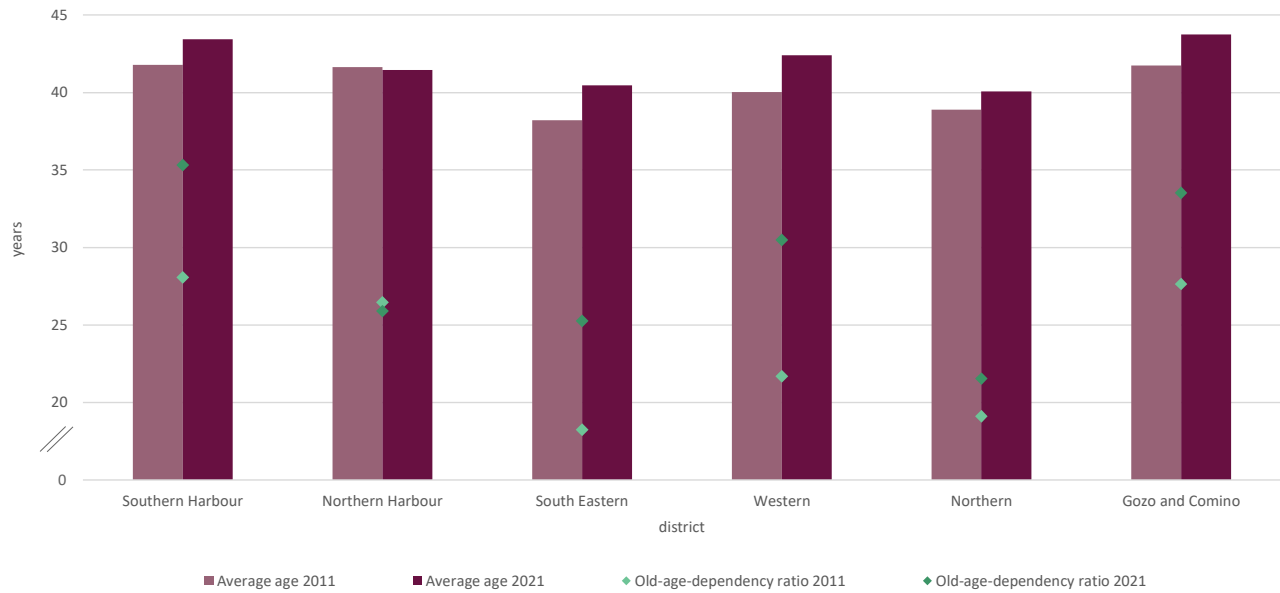

The average age of the population was 41.7 years. This shows that the upward shift in the age composition of the population continued over the past 10 years. The average in 2011 stood at 40.5 years.

As recorded in previous censuses, Gozitan residents were slightly older than the Maltese with average ages of 43.8 years and 41.5 years respectively. After the district of Gozo, the eldest district was the Southern Harbour, registering an average age of 43.4 years. On the contrary, residents of the Northern district were the youngest, at 40.1 years. The Northern Harbour district was the only district where a marginal decline in the overall average age was noted since 2011, from 41.6 to 41.5.

The dependency, and the old-age-dependency ratio also suggest that the Maltese population is ageing. The dependency ratio represents the ratio of the total number of dependents (aged 0 to 14 or over 64 years), to the working-age population aged 15 to 64. The ratio increased over the past 10 years, from 45.2 in 2011 to 46.7 in 2021.

On the other hand, the old-age dependency ratio represents the ratio of older dependents (over 64 years) to the working-age population aged 15 to 64. The ratio also increased from 23.7 in 2011 to 27.6 in 2021.

**CHART 1.4. Age by district: 2011-2021**

Even though the trend in the two indicators suggests an ageing population, both indicators are lower than the values for the EU (as at January 2021), suggesting that the Maltese population is still young relative to the EU.

#### **Institutions and other forms of alternative care**

A total 9,545 persons resided in institutions or other forms of alternative care dwellings. These were mostly females (57.5 per cent) and aged 65 years or more (66.7 per cent).

Notes:

- a. Gżira shown as a separate locality since 1948.
- b. New locality of Msieraħ (San Ġwann) constituted from parts of Birkirkara and St Julian's and shown as separate locality in 1967.
- c. New locality of Fgura constituted from parts of Paola, Tarxien and Haż-Żabbar in 1967.
- d. Marsaskala shown as a separate locality since 1957.
- e. New locality of Munxar constituted from parts of Ta' Sannat and Fontana.
- f. New locality of Fontana shown as separate locality in 1967.
- g. Gwardamangia formed part of Hamrun in 1967.
- h. Pieta' formed part of Msida in 1967.
- i. Santa Luċija formed part of Tarxien and Paola in 1967.
- j. Ta' Xbiex formed part of Msida and Gżira in 1967.
- k. Pembroke formed part of St Julian's in 1985.
- l. Swieqi formed part of St Julian's in 1985.
- m. Xgħajra formed part of Haż-Żabbar in 1985.
- n. Iklin formed part of Lija, Birkirkara, Naxxar and San Ġwann in 1985.
- o. Mtarfa formed part of Rabat in 1995.
- p. The boundaries of some localities were changed between 1995 and 2021.

**CITIZENSHIP  
AND COUNTRY  
OF BIRTH**

## CITIZENSHIP AND COUNTRY OF BIRTH

More than one in five residents were foreign, with 115,449 non-Maltese persons residing in Malta on Census Day. This implies an increase of more than five times in the share of foreigners since 2011, when the number of non-Maltese residents stood at 20,289.

Foreigners were predominantly males (59.3 per cent) and younger in age compared to their Maltese counterparts. The average age among foreigners stood at 34.9 years, while the average age of the Maltese was 43.6 years. Just more than a third of foreigners (34.7 per cent) are citizens of EU countries (EU27, excluding United Kingdom).

When analysing the geographic distribution of the foreign population, 22.4 per cent of persons resident in Malta were foreign while in Gozo the share was slightly lower at 19.5 per cent. Certain localities show a predominantly higher share of foreigners with almost a third of all foreigners in Malta residing in San Pawl il-Baħar, Tas-Sliema or Msida.

Italians made up the largest share of non-Maltese citizens, accounting for 12 per cent (13,838) of the foreign population. A further 9.2 per cent were British (10,614). The largest share of non-European citizens was Indian, at 16.2 per cent (7,764), followed by Filipinos (15.8 per cent).

Whereas across nearly all the districts the largest share of foreign residents was Italian, in Gozo, the largest share of non-Maltese residents was British (1,973 or 25.8 per cent).

In total, 18,752 Maltese citizens held a secondary foreign citizenship. Nearly half of these held the British or Australian citizenship with 25.3 per cent and 22.9 per cent respectively.

Note: For persons with two or more foreign citizenships, preference was given to the citizenship from an EU Member State over other countries. In cases of dual citizenship where at least two countries were within the European Union, the country of citizenship first chosen by the respondent, and/or matching administrative data, was recorded as the main citizenship. A similar approach was considered when none of the citizenships were within the European Union. A British citizenship was considered as a citizenship outside the European Union.

**MIGRATION**

## MIGRATION

A total of 14,822 persons immigrated to Malta in the year prior to the Census, more than three times the figure reported in 2011 (4,178 immigrants). The majority were males (58.4 per cent), and the largest share were aged between 20 and 39 years (63.7 per cent).

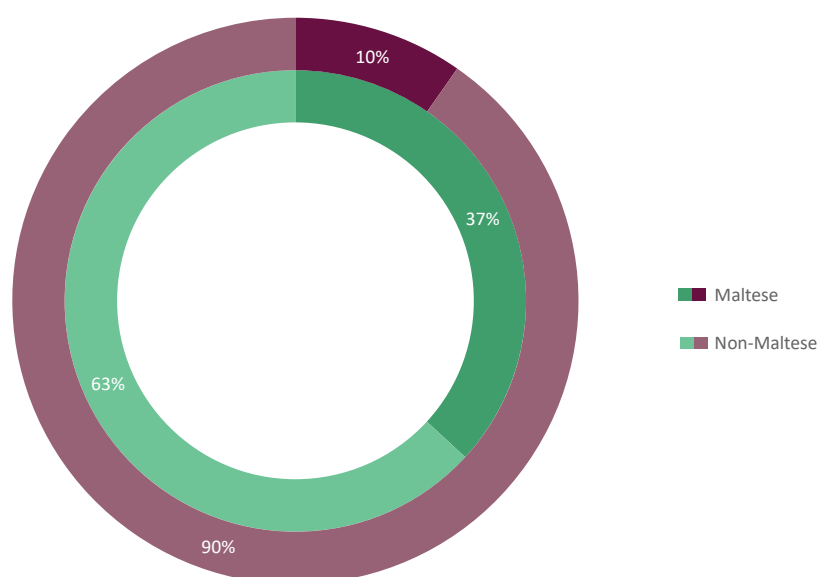

In terms of citizenship, 1,670 of these immigrants were Italian, followed by 1,435 Maltese citizens who returned to Malta after previously establishing their usual residence abroad. More than half of the immigrants were non-EU citizens (8,058 or 54.4 per cent), of which 848 were British. A total of 4,765 immigrants (32.1 per cent) were citizens from countries outside of Europe.

Following their arrival in Malta, more than half of these immigrants established a usual residence in the Northern Harbour district (7,587 or 51.2 per cent). This was followed by another 3,118 (or 21 per cent) who took up residence in the Northern district.

The majority of the population aged 1 year and over did not internally migrate in the year prior to the Census (93.5 per cent), while 18,558 persons changed their residence within the country. Of these, 9,147 moved to another dwelling in the same locality, while the remaining 9,411 also changed their locality of residence when changing their dwelling.

Despite changing locality of residence, most continued to reside in the same district. The only exception was for persons who migrated to the Western and Northern districts who, in the most part, moved here after previously residing in the Northern Harbour district.

**CHART 3.1. Distribution of immigrants within one year prior to the Census by nationality: 2011-2021**

Inner slice refers to 2011 data whereas outer slice refers to 2021 data.

# RACIAL ORIGIN

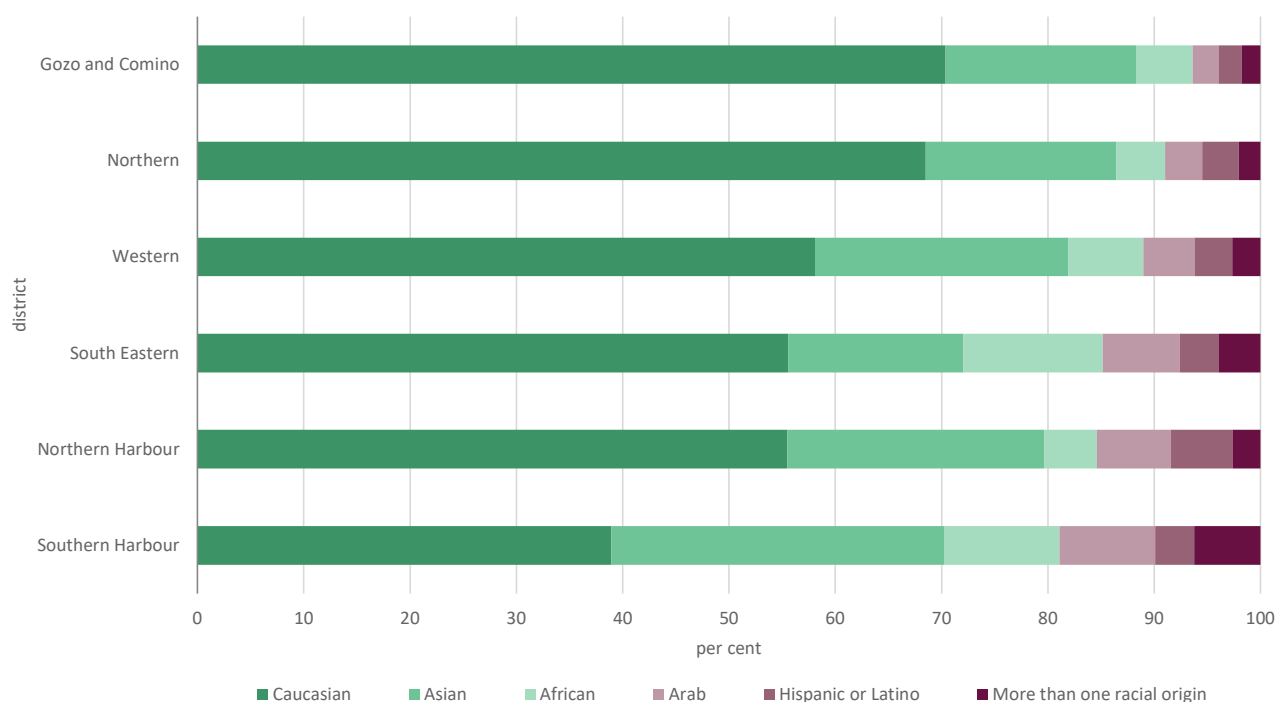

## RACIAL ORIGIN

Just under 90 per cent of residents were Caucasian, and a further 5.2 per cent were Asian. A total of 6,101 persons (1.2 per cent) had more than one racial origin.

Sex distributions vary by racial origin. The share of males and females among Caucasians was almost equal. In contrast, there was a higher share of males among Africans, at 78.8 per cent (or 6,442), and Arabs (66.8 per cent). The 30 to 39 age-cohort dominated across all distinct racial groups except for Africans. More than a third of Africans were aged between 20 and 29 years.

A total of 67,109 non-Maltese citizens (or 58.1 per cent) were Caucasian, followed by 25,625 Asians (or 22.2 per cent). Among Maltese citizens, 1,876 were Arab and 1,394 were Asian.

**RELIGIOUS  
AFFILIATION**

## RELIGIOUS AFFILIATION

Residents aged 15 years and over were asked to identify the religion, religious community, or denomination they felt they belong to. This was to be reported irrespective of the level of religious attendance or observance, or formal membership to a church or religious community.

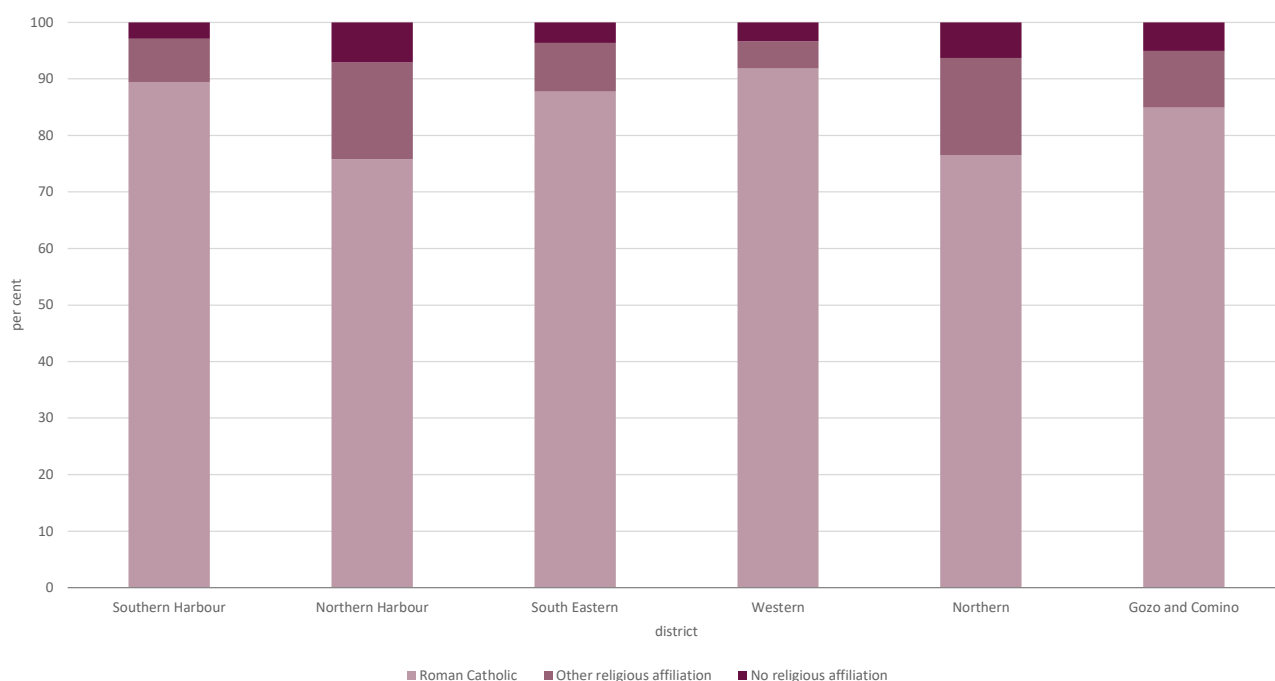

A total of 373,304 residents (or 82.6 per cent) identified themselves as Roman Catholic. Another 17,454 residents reported Islam to be their religion, followed by 16,457 persons who identified themselves with the Orthodox religion. A total of 23,243 residents (5.1 per cent) stated that they did not belong to any religion, religious denomination, or body.

When looking at the sex distribution by religious affiliation, the share of males and females was almost even among those identifying themselves as Roman Catholic. More than half (57.1 per cent) of those with no religious affiliation were males. There was a considerably larger share of males among residents who affiliated themselves with Islam (13,670 or 78.3 per cent) and Hinduism (4,510 or 70.3 per cent).

Just over two-thirds of the population who felt that they did not belong to the Roman Catholic religion, or who were not affiliated with any religion, resided in the Northern Harbour and Northern districts (42.9 per cent and 24.1 per cent respectively). Of these, 11,830 resided in San Pawl Il-Baħar, followed by 5,975 in Tas-Sliema and 4,861 in L-Imsida.

In total, 65,919 persons who did not identify themselves as Roman Catholic, or who were not affiliated with any religion (84 per cent), were non-Maltese citizens. Of these, 7,685 were British, followed by 4,781 Indians and 4,635 Serbians. Almost a third of those with no religious affiliation (7,254) were Maltese citizens.

# EXPLANATORY NOTES

### METHODOLOGICAL NOTE

#### Preliminary and Final Census results

The Census primary data collection phase – namely the completion of questionnaires either online or physically with the assistance of enumerators – took place between October and December 2021. The traditional follow-up exercise to a census consists of contacting/recontacting non-respondents and respondents to correct for any over- and under-enumeration.

This time round, it was possible to take a new approach by making extensive use of official auxiliary registers, the good quality of which the NSO had the opportunity to ascertain during previous statistical exercises. Through this facility, the Census Office could estimate information on persons who did not participate directly in the Census for various reasons. This filling-in of information gaps made possible the introduction of a weighting factor at the stage of preparation for the Census preliminary report. Moreover, the follow-up proceeded by a combination of recontacting dwellings and further examination of administrative records, to verify address details and assess eligibility criteria. By means of this more efficient hybrid method, the Census Office was able to finalise the population count in time for the publication of the preliminary report, about seven months after concluding the fieldwork.

The Census Office then concentrated its energy on the final report, of which this is the first thematic publication. These publications will present data on different social topics, thereby maximising the usefulness of the Census by giving scope for the extraction of deeper insights to enrich research and better inform policy making. Another two thematic publications will follow: one focusing on Housing and another targeting other personal socio-economic characteristics.

### CONCEPTS AND DEFINITIONS

The following definitions are based on the requirements outlined within Eurostat Regulations and recommendations from the UNECE for the 2020/21 Census of Population and Housing.

Comparison of the 2021 Census data with census data prior to 2011 should be conducted with caution due to differences in definitions and eligibility criteria applied. The same applies for the comparison of data by region between different censuses since the boundaries of some of the local councils which identify the localities may have changed over time.

#### Census night

For the 2021 Census this point was 21 November 2021. All data collected was at midnight of 20/21 November

#### Usual residents

- i. Persons who have lived in Malta for a continuous period of at least 12 months before Census night; or
- ii. Persons who have arrived in Malta during the 12 months before Census night with the intention of staying in Malta for at least 12 months; or
- iii. Persons who moved to a country other than Malta for a period of less than 12 months who have the intention to return to Malta; or
- iv. Children who were born in Malta during the 12 months before Census night, and are expected to live in Malta for at least 12 months; or
- v. Children who were born abroad during the 12 months before Census night, have arrived in Malta and are expected to live in Malta for at least 12 months.

Irregular or unoccupied migrants are also included in the resident population with the same rules of usual residence applying. Asylum-seekers and persons who have applied for or have been granted refugee status or other types of international protection are included in the resident population if the duration of stay in Malta is, or is expected to be, at least 12 months.

## Place of usual residence

All persons must be enumerated where they normally reside which need not necessarily be the same as the address on their identity card or other registered identification document. The place of usual residence is the place where a person normally spends the daily period of rest, regardless of temporary absences for purposes of recreation, holidays, visits to friends and relatives, business, medical treatment, or religious pilgrimage.

Persons are temporarily absent from their place of usual residence if they are absent, or expected to be absent, at the time of the Census for less than 12 months. Temporarily absent persons are also included in the total enumerated population. Persons who are temporarily present but are not living or expecting to live in their current place of residence (or institution) for a period of at least 12 months are not enumerated as part of that dwelling. Residence abroad refers to any place of usual residence outside Malta where persons usually spend nights for a continuous period of at least 12 months.

Some exceptional cases however exist:

- i. Persons who live regularly in more than one residence during the year, are enumerated at the place where they spend the majority of the year, regardless of whether this is located elsewhere in Malta or abroad. However, persons who work away from home during the week and return to the family home at weekends shall consider the family home to be the place of usual residence (even if place of work is abroad). For example, Gozitans who work in Malta but reside in Gozo are enumerated in Gozo.
- ii. Primary and secondary students who are away from home during the school term are enumerated within their family home regardless of whether they are pursuing their education elsewhere in Malta or abroad.
- iii. Tertiary students who are abroad while at college or university are enumerated at their term-time address, regardless of whether this is an institution or a private residence. Tertiary students who are away from home while receiving education in Malta or Gozo, should consider their place of usual residence to be their family home (e.g. Gozitan University students residing in Malta should be enumerated in Gozo).
- iv. An institution is taken as the place of usual residence of all its residents who at the time of the Census have spent (or are likely to spend) 12 months or more living there.
- v. Children who alternate between two places of residence (for example, as a result of separated or divorced parents) shall consider the residence where they spend the majority of the time as their place of usual residence. If they spend the same amount of time in multiple residences, the place where the children are found on census night is taken as the place of usual residence.

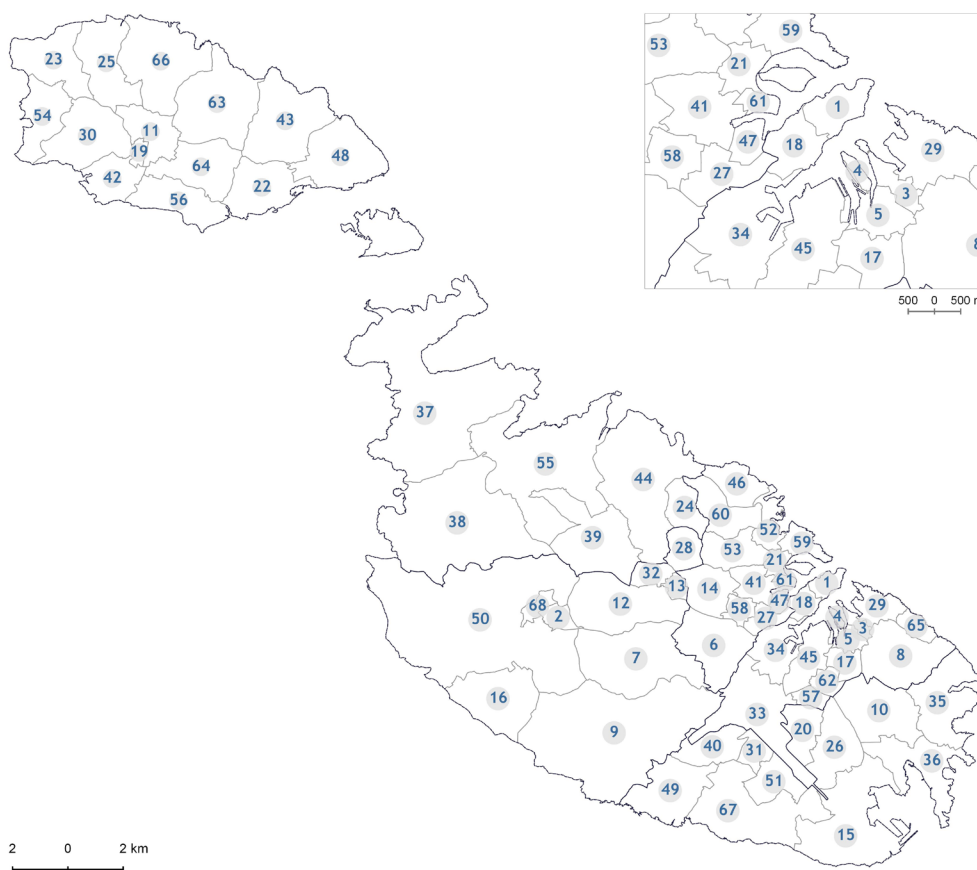

## District

For aggregation purposes, all Maltese localities were grouped according to the Local Administrative Unit (LAU) classification into six districts as follows:

### Graphical Illustration of MALTA by LAU 2 Classification District

For aggregation purposes, all Maltese localities were grouped according to the Local Administrative Unit (LAU) classification into six districts as follows:

- i. **Southern Harbour:** Bormla, Floriana, Ғal Luqa, Ғal Tarxien, Ғaž-Żabbar, Il-Birgu, Il-Fgura, Il-Kalkara, Il-Marsa, Ix-Xgħajra, L-Isla, Raħal Ġdid, Santa Luċija, Valletta.
- ii. **Northern Harbour:** Birkirkara, Ғal Qormi, Il-Gżira, Il-Ғamrun, Is-Swieqi, L-Imsida, Pembroke, San Ġiljan, San Ġwann, Santa Venera, Ta' Xbiex, Tal-Pieta', Tas-Sliema.
- iii. **South Eastern:** Birżebbuġa, Ғal Għaxaq, Ғal Kirkop, Ғal Safi, Il-Gudja, Il-Qrendi, Iż-Żejtun, Iż-Żurrieq, L-Imqabba, Marsaskala, Marsaxlokk.
- iv. **Western:** Ғad-Dingli, Ғal Balzan, Ғal Lija, Ғ'Attard, Ғaž-Żebbuġ, Ir-Rabat, Is-Siġġiewi, L-Iklin, L-Imdina, L-Imtarfa.
- v. **Northern:** Ғal Għargħur, Il-Mellieħa, Il-Mosta, In-Naxxar, L-Imġarr, San Pawl Il-Baħar.
- vi. **Gozo and Comino:** Għajnsielem and Comino, Il-Fontana, Il-Munxar, Il-Qala, In-Nadur, Ir-Rabat, Għawdex, Ix-Xagħra, Ix-Xewkija, Iż-Żebbuġ, L-Għarb, L-Għasri, San Lawrenz, Ta' Kerċem, Ta' Sannat.

**Population density**

The ratio of the Census population of a region to the (land) area of the region.

**Institutions**

An institutional dwelling is understood to be a legal body used for the purpose of long-term habitation and provision of services to a group of persons. This includes homes for the elderly, refugee homes/open centres, convents, prison, hospitals, etc. An institution is normally a separate and independent set of premises comprising all or part of a permanent building or set of buildings which by the way it has been built, rebuilt or converted, is designed for habitation by a large group of persons.

**Citizenship**

The legal bond between an individual and his/her State, acquired by birth, registration or naturalisation.

**Foreign citizens**

Usual residents of Malta who do not hold the citizenship of Malta.

**EU citizens**

Citizens of countries which form part of the EU-27 group:

Belgium, Bulgaria, Czech Republic, Denmark, Germany, Estonia, Ireland, Greece, Spain, France, Croatia, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Hungary, Malta, Netherlands, Austria, Poland, Portugal, Romania, Slovenia, Slovakia, Finland, and Sweden.

Owing to the United Kingdom's exit from the European Union, British citizens are classified as non-EU citizens.

**Immigrants**

Foreign citizens arriving from abroad, or Maltese persons returning from abroad, with the intention of residing in Malta for at least 12 months.

**Dependency ratio**

The ratio of the total number of dependents (aged 0 to 14 or over 64 years), to the working-age population aged 15 to 64.

**Old-age dependency ratio**

The ratio of older dependents (over 64 years) to the working-age population aged 15 to 64.

**Country of birth**

The place of usual residence of the mother at the time of the birth, or if not available, the place in which the birth took place.

**Religious affiliation**

The set of beliefs and practices with which respondents identify themselves, regardless of the level of religious attendance or observance, or formal membership to a church or religious community.

**Racial origin**

The race of the person based directly on the racial origin of his/her ancestors. A person may have more than one racial origin if his/her ancestors are of a different race.

**Residence abroad**

Residence abroad refers to any places of usual residence outside the Maltese territory where persons normally spend nights for a continuous period of at least 12 months.

**Year of arrival in Malta**

The calendar year in which a person most recently established usual residence in Malta, disregarding any earlier interrupted stays which the person might have had in the country.
